

OMNTEC

IN CONTROL

Custom Electrical Control Panels

Pump controls available for duplex, alternating and lead lag pumps. Panels may include relay contacts for pump control and remote annunciation, disconnect switches, pump failure and running indicators, tank selector switches, HOA (hand off auto) switches, motor starters, local alarm horn and lights.

All panels are built with U.L. recognized components.

Enclosures available in NEMA 4, 4X, 7, and 12.

Controllers based on PLC (programmable logic controller) technology.

Pump In/Pump Out Control

Alternating Pump Control

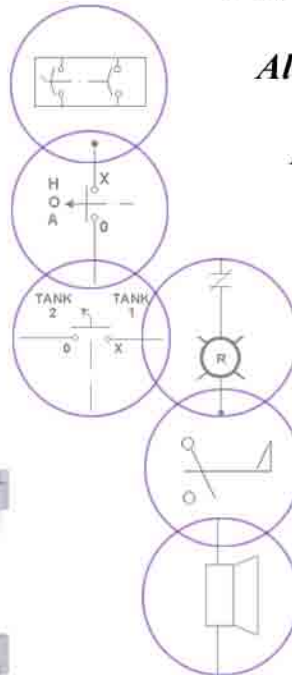

Lead Lag Pump Control

Duplex Pump Control

Tank Drain Control

Tank Fill Control

Valve Control
